About this boat

New to be built! The Barkas is a beautiful sight as she sails by. The ship is built of polyester and finished with wood. Wood such as teak and mahogany has been used for this, which gives a quality appearance. The boat has been modified and has a new underwater hull, so the boat has very good sailing characteristics at speeds of 20 to 25 knots. For lower cruising speeds the Barkas is equipped with a very powerful electric motor. The motor provides a quiet and comfortable ride. Mark Hesselmans at De Valk Loosdrecht is your go-to contact for any questions. Feel free to give us a call. We provide only a selection of key information on this platform. For complete details, please visit our website, where you'll find...
