About this boat

The young yacht architect David Marsh was commissioned to design a stylish, fast motor cruiser with good seagoing characteristics. The Power 50 is the result. High tensile steel medium/deep-V semi-displacement/planning hull constructed by CroftMarine scantlings to Lloyd's of Londen and American Bureau of Shipping requirements. (High tensile steel is 25% stronger than conventional steel). A polyester superstructure has been placed on the steel hull of the Power 50. This combination was chosen so that the strength of the steel hull could be combined with the multifaceted, supple curves possible for a polyester superstructure. 4-millimeter-thick naval steel was used for the sharp V-hull. Below a flat deckline is a...
